FOR IMMEDIATE RELEASE

Spartanburg, South Carolina (February 4, 2011)- HOKE, the Logical Choice for Safety and Reliability, is now Certified to ASTM F 1387 Standards.

HOKE has certified GYROLOK® 316 Stainless Steel fittings from ¼” to 1” to the ASTM F 1387-99 (2005) performance standards for mechanically attached fittings. This certification establishes performance characteristics for fittings which directly attach to pipe or tube by deforming the pipe, tube or fitting which creates a seal and therefore a restrained joint. Historically ASTM F-1387 certification was a requirement for all naval surface ships. In recent years it’s become a requirement for fittings used in petrochem applications and other key markets.
