Large Diameter Gyrolok® Tube Fittings

Hoke, Inc. announces the extension of its Gyrolok Tube Fitting offering to include sizes up to 2" and 38mm. Gyrolok Tube Fittings are now available in fractional sizes from 1/16" through 2" and metric sizes from 3mm to 38mm. Gyrolok Tube Fittings in sizes over 1" (25mm) are offered, as standard, in 316 stainless steel. Hoke's Gyrolok Tube Fittings, in all sizes, provide safe, leak-free, reliable performance from cryogenic temperatures to high temperature bake out levels and have a pressure rating greater than suitable tubing.

The large diameter Gyrolok Tube Fittings were developed to meet the demanding requirements of the chemical, petrochemical, oil and gas, industrial, and alternative fuels markets. This extension to the Hoke Gyrolok Tube Fitting line offers a broad selection of sizes and connection types, including various straight connectors, adapters, elbows, tees, and reducing tees.

Hoke products have set the industry standard for over 70 years for product safety, operability, durability, and reliability. Hoke produces Gyrolok Tube Fittings, as well as instrumentation ball valves, needle valves, plug valves, metering valves, cylinders, cylinder valves and manifolds. The company serves customers in the chemical, petrochemical, oil and gas, industrial, semiconductor, and alternative fuels markets.
